baby lock

Accessories

OVERLOCK · COVERSTITCH · COMBINATION

The perfect accessories for every project

In the extensive range of baby lock accessories you will quickly find the correct item to easily complete your creative sewing projects.

With this brochure we would like to give you an insight into our wide range of extras to make your sewing journey easier! You'll find herein a few ideas for enhancing various projects, which hopefully will trigger a few original ideas of your own.

In addition to our sewing ideas, the brochure also provides you with a complete overview of all the accessories that are available for our baby lock machines.

Have you found a particular product of interest? Ask your specialist dealer, they will have all our accessories ready for you.

We hope you enjoy browsing through our range wish you and good luck with all your projects!

OVERLOCK-MACHINEN
sewing, serging, cutting – all in one step.

COVERSTICH-MACHINES
sew elasticated seams on hem edges with one, two or three needles.

COVERLOCK-MACHINES
are combined machines. They can be used to produce both overlock seams and coverstitch seams, as well as combinations of both seam types.

3-thread flatlock seam decorates child´s shirt
... very easy with the blind hem foot

We used the 3-thread flatlock seam and the baby lock blind hem foot for this shirt. With the help of this foot, the very decorative flat seam can be conjured up quickly and easily. After carefully pulling the seam apart, the fabric lies completely flat again, no fold is visible.

This creates a special effect - the shirt looks as if it were embroidered.
Sewing these seams in differing directions creates a unique pattern. This is how you create your very own individual projects!

BLIND HEM FOOT FOR OVERLOCK MACHINES

BLIND HEM FOOT FOR COMBINATION MACHINES

Give new life to worn-out jeans
... by tidying the edges with bias tape

With double or single fold bias binders, bias tape can be sewn quickly and precisely to fabric edges. Time-consuming ironing or pinning is now a thing of the past. With our binders, bias tape is continuously guided during sewing. The Double Fold Bias Binder folds both top and bottom edges evenly and aligned. With a little practice, all edges, corners and curves can be finished in this way.

Necklines on T-shirts, leg cut-outs and armholes on underwear or bodysuits are are often enhanced in this way.

baby lock offers double and single fold bias binders in different sizes, with and without guide rake.

DOUBLE FOLD BIAS BINDER WITH GUIDING RAKE

SINGLE FOLD BIAS BINDER

Sporty outfit gets unique back section and sleeve ending

With the belt loop folder you can not only make simple loops for trousers. If you sew a long ribbon and cut it into shorter pieces, a T-shirt, for example, can become a real eye-catcher – and not only in aerobics class.

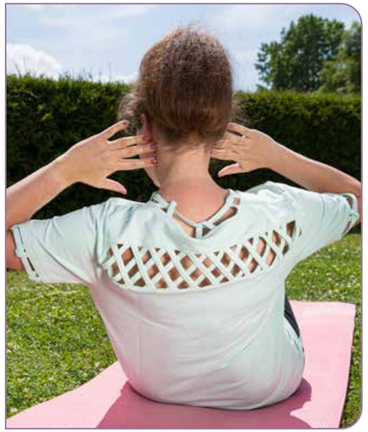

Necklines, sleeve edges, and many other projects can be enhanced with the belt loop folder.

There are no limits to your imagination.

BELT LOOP FOLDER

OPEN TOE FOOT WITH GUIDE LINES

Cute pintuck shirt hemmed with chain stitch.

This cute blouse is sewn with the pintuck foot and the plain hemmer. The pintuck foot creates the typical pleats on the project. Of course, you can also sew pintucks without an extra foot. But this is rather complicated and requires some practice. The pintuck foot does all the work. No more ironing, no more measuring, no more paying attention. All you need to know is where the pintucks should be and you're ready to go. The baby lock pintuck foot comes with a pintuck tongue and a tape guide. It allows you to sew a filled pintuck with a cord. This type gives the pintuck stability and like a piped appearance.

The pintuck foot is available for coverstitch and combination machines.

The hem finishes decorated with the chain stitch are another highlight. They were sewn with the plain hemmer.

PINTUCK FOOT

PLAIN HEMMER

City trip or hiking tour – a backpack is always with you

The lap seam folder was used to make the two backpacks. A backpack should be able to withstand a lot. That's why the lap seam folder is suitable for sewing the individual fabrics. During the sewing process, both fabric edges are folded over in opposite directions and the cut edges lie inside the fabric.

This makes this seam extremely hard-wearing and it is therefore easy to sew together coarse and thick fabrics such as denim, cork, decorative fabrics, suede and loden.

If you use decorative threads, it also becomes an eye-catcher.

LAP SEAM FOLDER

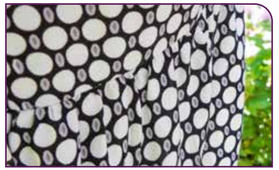

Swinging falling tiered skirt
... created in no time at all with the gathering foot

Admittedly, you don't need an extra foot to crimp a fabric. If you set the differential to the highest level (2) and sew a 4-thread seam, the fabric will gather. However, only thin woven fabrics can be gathered well in this way. If a strip of fabric is to be gathered, the gathering foot is the method of choice.

This foot not only saves time, but also produces an even and neat result, because it performs three steps at the same time: it joins and overlocks two layers of fabric, while the bottom layer is evenly gathered. This works particularly well with soft woven fabrics.

GATHERING FOOT FOR OVERLOCK MACHINES

GATHERING FOOT FOR COMBINATION MACHINES

Stylishly to the next celebration
... with accents through pearls or sequins

A foot for many great accents is the bead and sequin foot. It is used for sewing on beads, sequins and lead tape as well as for sewing on cords or making piping. It can be used not only to add great details to garments or scarves, as seen here on this celebratory outfit.

Narrow ribbons, offset with pearls or sequins, for example, serve as a very personal and individual hair decoration for a wedding hairstyle.
With this foot, baby lock allows your creativity to run free!

BEAD AND SEQUIN FOOT FOR OVERLOCK MACHINES

BEAD AND SEQUIN FOOT FOR COMBINATION MACHINES

TIP
Make a piping and sew it into a project as a decorative edge.

Decorative elastic band
... as a waistband for comfortable clothing

The elastic foot is the most versatile of the special feet because it has two functions. In just one operation, it sews elastic of different widths evenly stretched and serges everything. It also awakens the imagination of creative tinkerers. With the rolled hem, this foot can also be used to easily enclose fishing line, elastic cord or craft wire.

These then unfold their amazing effect as jewellery utensils, gift ribbon or hair clip creations.
They make a grand entrance as wavy hems on dance or wedding dresses.

ELASTIC FOOR FOR OVERLOCK MACHINES

ELASTIC FOOR FOR COMBINATION MACHINES

TIP
The stability of the seam can be increased by incorporating a fishing line.

BLIND HEM FOOT

The blind hem foot lets you sew invisible hems on medium- to heavy weight fabrics.

ITEM NO.:
B5002S02A

for all overlocker machines

PIPING FOOT

This foot has a special guide groove in its sole. The cord or even zipper is precisely fed via this groove and can thus be inserted between two layers of fabric precisely.

ITEM NO.:
B5002-02A-C (3 mm)
B5002-03A-C (5 mm)

for all overlocker machines

ELASTIC FOOT

The elastic foot lets you sew on elastic tapes of different widths with an even stretch. This foot also has a special port through which an accompanying thread or a fishing line can be inserted to stabilise the seam.

ITEM NO.:
B5002S01A

for all overlocker machines

TRANSPARENT PRESSER FOOT

This is the transparent version of standard presser foot.

ITEM NO.:
B5002K02A-E

for all overlocker machines

GATHERING FOOT

The gathering foot is used to join two layers of fabric and gather the lower layer at a ratio of 2:1 in one go.
Adjusting the differential feed and stitch length will alter the amount of gathering.

ITEM NO.:
B5002S03A

for all overlocker machines

BEAD / SEQUIN FOOT

This foot can be used to sew bead strings either to the edge of the fabric or to attach them to the centre of the fabric. It is used for sewing on beads, sequins and lead tape as well as for sewing on cords.

ITEM NO.:
B5002-01A-C

for all overlocker machines

LACE APPLICATOR FOOT

This foot makes it very easy to sew lace or borders onto the top of the fabric without damaging it. The edge of the fabric is overlocked in the same step.

ITEM NO.:
B5002S05A

for all overlocker machines

SLIDING FOOT

This foot's sole has a special coating that lets you sew materials such as oilcloth, fleece, etc. without difficulty. Thanks to its rigid rear part, the foot crosses easily over seams, thus avoiding any accumulation of fabric.

ITEM NO.:
F0-73K02

for all overlocker machines

FLAT SOLE FOOT

This foot makes it easier to sew over several layers of fabric (fleece, denim, overlapping seams, etc.). The long, rigid design distributes the pressure of the foot very well and makes it easier to work on difficult areas.

ITEM NO.:
B5001T02B-C

for all overlocker machines

TRANSPARENT FLAT SOLE FOOT

The Transparent Flat Sole Foot, a better view of the seams is made possible, especially useful for decorative seams. The transparency of the foot is a great advantage as it allows for precision when steering. Its long, smooth sole ensures effortless movement across several layers.

ITEM NO.:
F0-36025

for all overlocker machines

Overview accessories coverlock machines

BLIND HEM FOOT

The blind hem foot lets you sew invisible hems on medium- to heavy weight fabrics.

ITEM NO.:
B5002S06A-E

for all combination machines

PIPING FOOT

This foot has a special guide groove in its sole. The cording or zip is precisely fed via this groove and can thus be inserted between two layers of fabric precisely.

ITEM NO.:
B5002-11A-C (3 mm)
B5002-05A-C (5 mm)

for all combination machines

ELASTIC FOOT

The elastic foot lets you sew on elastic tapes of different widths with an even stretch. This foot also has a special port through which an accompanying thread or a fishing line can be inserted to stabilise the seam.

ITEM NO.:
B5002S09A

for all combination machines

TRANSPARENT PRESSER FOOT

This is the transparent version of standard presser foot.

ITEM NO.:
B5002S14A

for all combination machines

GATHERING FOOT

The gathering foot is used to join two layers of fabric and gather the lower layer at a ratio of 2:1 in one go.
Adjusting the differential feed and stitch length will alter the amount of gathering.

ITEM NO.:
B5002S07A

for all combination machines

BEAD / SEQUIN FOOT

This foot can be used to sew bead strings either to the edge of the fabric or to attach them to the centre of the fabric. It is used for sewing on beads, sequins and lead tape as well as for sewing on cords.

ITEM NO.:
B5002-04A-C

for all combination machines

LACE APPLICATOR FOOT

This foot makes it very easy to sew lace or borders onto the top of the fabric without damaging it. The edge of the fabric is overlocked in the same step.

ITEM NO.:
B5002S08A

for all combination machines

SLIDING FOOT

This foot's sole has a special coating that lets you sew materials such as oilcloth, fleece, etc. without difficulty. Thanks to its rigid rear part, the foot crosses easily over seams, thus avoiding any accumulation of fabric.

ITEM NO.:
B5002T21A

for all combination machines

PINTUCK AND PIPING FOOT

The pintuck foot and associated pintuck tongue lets you easily sew perfect pintucks and small folds with the coverstitch. The cord guide means any cord can be inserted into the pintucks to give them stability and shape.

ITEM NO.:
B5002-06A-C

for all combination machines

COVERSTITCH FOOT

The coverstitch foot is very narrow and used to produce a neat coverstitch. Thanks to its narrow form, it guarantees a good view of the seam and perfect fabric feed.

ITEM NO.:
B5002S10B

for all combination machines

CURVING FOOT

This is a special foot that is ideal to stitch curves or sew over cross seams. Thanks to its short size and rigid rear part, it masters its tasks perfectly. The foot can also be used to sew necklines, cuffs, sleeves and children's wear.

ITEM NO.: MO-36034

for all combination machines

TRANSPARENT CURVE FOOT

The transparent curve foot is ideal for curved seams and provides a better view of your sewing project. It also makes it easy to sew over cross seams. Narrow sleeve cuffs and necklines will no longer pose any problems when it comes to finishing the edges. Thanks to the guide slot, even ribbons can be taken up and integrated into the seam.

ITEM NO.: MO-36062

for all combination machines

OPEN TOE FOOT WITH GUIDE LINES

This foot is perfect for cover-stitching. The large opening at the front gives you extra visibility and the red markings help you align stitching lines exactly. Thanks to its rigid rear part, the foot crosses easily over seams.

ITEM NO.: B5002T20A

for all combination machines

PINTUCK AND PIPING FOOT

The pintuck foot and associated pintuck tongue lets you easily sew perfect pintucks and small folds with the coverstitch. The cord guide means any cord can be inserted into the pintucks to give them stability and shape.

ITEM NO.:
B5002-06B-C-E

for all coverstitch machines

SLIDING FOOT

Sliding Foot is ideal for use on dull and heavy fabrics such as vinyl, denim, fleece or synthetic leather. The special coating on the underside of the foot makes it easy to glide over several layers.

ITEM NO.:
M2-36A08

for Euphoria

TRANSPARENT PRESSER FOOT

This is the transparent version of standard presser foot.

ITEM NO.:
B5002S17A

for all coverstitch machines

FEET SET FOR OVERLOCK AND COMBINATION MACHINES

Would you like to have a selection of feet and a storage box to keep them in?
If so, the baby lock feet set is the right choice for you!

This feet set gives a multitude of choices for both decorative and functional stitching.
Includes:

FOR OVERLOCK-MACHINES

- Piping foot 5 mm
- Piping foot 3 mm
- Blind hem foot
- Elastic foot
- Bead and sequin foot
- Gathering foot

ITEM NO.:

for all
overlocker machines

FOR COMBINATION-MACHINES

- Piping foot 5 mm
- Blind hem foot
- Bead and sequin foot
- Elastic foot
- Lace applicator foot
- Gathering foot

ITEM NO.:
A6TA8

for all
combination machines

ACCESSORIES SETS COVERSTITCH AND COMBINATION MACHINES

Two accessories sets complement the range of our coverstitch and combination machines. Five practical helpers can be found in this really pretty box:

- Double fold bias binder with guide rake 36 mm
- Plain hemmer 1/2"
- Single downturn feller 5/8"
- Belt loop folder 3/4"
- Pintuck and piping foot

ITEM NO.: BL-6000-02

Combination machines
for Goria and Ovation

ITEM NO.: BL-6000-03

Coverstitch machines
for Euphoria and coverstitch

Overview special devices for combination machines and coverstitch

SINGLE FOLD BIAS BINDER

The single fold bias binder is a quick and precise solution when you want to bind fabric edges or necklines with a bias or jersey tape using the coverstitch or double chain stitch. The upper side of the bias or jersey tape is folded and the lower side remains flat, thus reducing the thickness.

ITEM NO.:
B0421S04A (28 mm)
inlet 28 mm–outlet 7 mm

B0421S05A (40 mm)
inlet 40 mm–outlet 12 mm

for all combination machines and coverstitch models

SINGLE FOLD BIAS BINDER WITH GUIDING RAKE

The single fold bias binder is a quick and precise solution when you want to bind fabric edges or necklines with a bias or jersey tape using the coverstitch or double chain stitch. The upper side of the bias or jersey tape is folded and the lower side remains flat, thus reducing the thickness. The guide rake keeps the fabric strip in shape and allows a little tension to be applied to the strip.

ITEM NO.:
D13-3-12E (32 mm)
inlet 32 mm–outlet 12 mm
D13-3-15E (40 mm)
inlet 40 mm–outlet 15 mm

for Gloria, Ovation, Euphoria and coverstitch

DOUBLE FOLD BIAS BINDER

The double fold bias binder is a quick and precise solution when you want to bind fabric edges or necklines with a bias or jersey tape using the coverstitch or double chain stitch. Both the upper and lower side of the bias or jersey tape are folded, leaving a clean finish on both sides.

ITEM NO.:
B0421S03A (28 mm)
inlet 28 mm–outlet 7 mm
B0421S02A (36 mm)
inlet 36 mm–outlet 10 mm

for all combination machines and coverstitch models

DOUBLE FOLD BIAS BINDER WITH GUIDING RAKE

The double fold bias binder is a quick and precise solution when you want to bind fabric edges or necklines with a bias or jersey tape using the coverstitch or double chain stitch. Both the upper and lower side of the bias or jersey tape are folded, leaving a clean finish on both sides. The guide rake keeps the fabric strip in shape and allows a little tension to be applied to the strip.

ITEM NO.:
D13-4-08E | *inlet 30 mm–outlet 8 mm*
D13-4-10E | *inlet 36 mm–outlet 10 mm*
D13-4-12E | *inlet 42 mm–outlet 12 mm*
D13-4-15E | *inlet 48 mm–outlet 15 mm*

for Gloria, Ovation, Euphoria and coverstitch

LAP SEAM FOLDER

With the lap seam folder, the fabric edges are folded in opposite directions so that both cut edges are inside the fabric seam at the end. This makes it easy to sew together coarse and thick fabrics such as denim, cork and decorative fabrics.

ITEM NO.:
B0-75001

for Gloria, Ovation and Euphoria

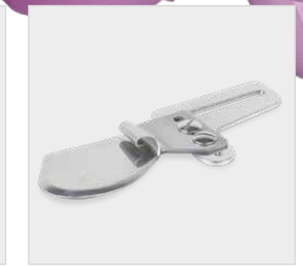

SINGLE DOWNTURN FELLER

To sew a simple hem professionally and quickly, use the single downturn feller with the wide, narrow or triple coverstitch. Three different sizes of Feller give you a variety of options for differing fabrics.

ITEM NO.:
B0421S08A (5/8" = 15,875 mm)
B0421S09A (1"= 25,4 mm)
B0421S10A (1/4"= 6,35 mm)

for all combination machines and coverstitch models

PLAIN HEMMER

This hemmer is used for straight sleeve ends and hems. It is sewn from the left. This means that the looper thread is visible on the right side of the fabric and acts as a decorative seam.

ITEM NO.:
B0421S06A (1/2" = 12,7 mm)
B0421S07A (1/4" = 6,35 mm)

for all combination machines and coverstitch models

TAPE GUIDE

This tape guide, adjustable up to a width of 60 mm, keeps an exact distance to the fabric edge. This is very helpful when sewing on e.g. ribbons and braids in a straight line.

ITEM NO.:
B0421S01A

for all combination machines and coverstitch models

Overview special devices for combination machines and coverstitch

BELT LOOP FOLDER

Whether belt loops or shoulder straps, this accessory ensures you get the perfect result using a coverstitch.

ITEM NO.:
B0421S12A (3/4" = 19,05 mm)
B0421S11A (1 1/2" = 38,1 mm)

for all combination machines and coverstitch models

FABRIC GUIDE

The fabric guide makes it easier for you to sew exact turn-ups or hem edges.

ITEM NO.:
B04202S01A

for desire$_3$ and coverstitch

FABRIC GUIDE

Thanks to the adjustable edge, this guide allows precise placement of the hem/ cover and thus guarantees the correct seam spacing.

ITEM NO.:
M0-70A09

for Gloria, Ovation and Euphoria

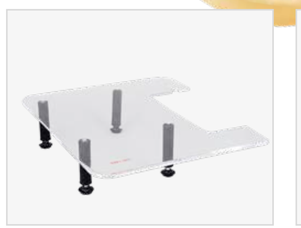

STITCH GUIDE

The stitch guide enables precise sewing and guiding
of stitches at an adjustable distance.

baby lock Compendium

... complete protection for your baby lock machine!

We have created all the information in this guide for use with our overlock, coverstitch and combination machines. Inside you will find insider tips, troubleshooting ideas, along with information on needles and threads.

We present overlock and cover seams in all their variations, describe the appropriate settings on the machine and explain where the respective seams are usually used. Since a picture is worth a thousand words, there is also a detailed illustration of each seam. We invite you to contribute to the final appearance of this book:

There is enough space on each page to paste in your self-made seam example. The practical ring binder also makes it easy to add further information. In this way, you will develop your own individual „workbook for all cases" over time.

The basic equipment of this pattern book includes information on needles and yarns as well as insider tips or a troubleshooting guide. We have created all this information for our overlock, coverstitch and combination machines.

ITEM NO.: BL-6000-08

for overlock and coverstitch machines

ITEM NO.: BL-6000-09

for combination machines

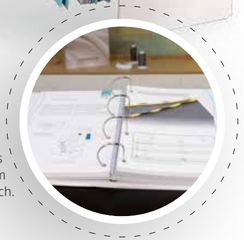

The 'Tips and tricks' chapter contains useful tips from experienced baby lock product consultants.

By sticking in your own samples gives the compendium a personal touch.

Sewing table
with love for detail

A sewing table is now available again for all „big" baby lock machines.

Developed in Germany with high quality standards, a Scandinavian-style, modern design and loving attention to detail, the sewing table comes with numerous great elements. It turns your workplace into an oasis of well-being!

AT A GLANCE

- suitable for Gloria, Ovation, Euphoria & Acclaim
- generous work surface: 56 x 65 cm
- recess for knee lever
- magnetic shelf
- storage options in the side panels, with pull-out and small bamboo drawers
- built-in holder for waste bag, incl. hand-sewn bag
- well thought-out cut-outs for power and starter cables
- table dimensions: 106 x 65 x 80 cm (LxWxH), with optional castors 6 cm higher
- scratch resistant surface with beautiful decorative edges

ITEM NO.: BL-3000-08

Gloria, Ovation, Euphoria and Acclaim

Integrated magnetic tool tray keep your workplace tidy and safe.

Perfectly stowed away: your thread spools and needles are safely stored and always to hand.

A handy waste bag holder keeps your workplace clean.

Generous working surface for the largest projects.
